What have we heard them say?

What can we imagine them saying?

Tableau helps us visualize complex aviation data."

"We need more realtime data integration." **Air Transportation Types**

- Combi Aircraft
- Cargo Aircraft
- Super **Transporters**

" I hope Tableau can simplify the data visualization process."

Thinks

Understanding passenger flow and route optimization is crucial for airlines.

"We want to identify trends and anomalies quickly."

" Analyzing the golbal air transportation network could lead to costsaving strategies." " I need to find the right data sources for this analysis."

Unlocking Insights into the Global Air Transporation Network with Tableau

Researches and gathers relevant data sources.

Imports data into Tableau and begins creating visualizations.

Excited about the potential discoveries in the data.

Anxious about the complexity of the dataset.

Colloborates with colleagues to share insights and findings

Takes online courses or seeks helps from forums to enhance Tableau skils.

Eager to make a positive impact on the airline industry.

Curiosity about the latest aviation trends.

Does

What behavior have we observed? What can we imagine them doing? **Feels**
